### Questions

“ .....

One of the world's most famous technology companies is preparing to **launch** a smartwatch this week. Experts say it's one of the best smartwatches. It has lots of different functions. You can connect it to your mobile phone or laptop **via** Bluetooth and it can connect to an app store which has over 2,000 **applications**. In this way, you can have **access** to lots of information. For example, you can see text messages, videos, calls and reports from social media accounts. You can also control e-mails and view calendar events. You can set timers, alarms and reminders. You can use it as a **remote control** for mobile phones, cameras and home appliances like radios. The device is waterproof so you can wear it even when you swim. It has a 5-day battery life. It's believed to be a very popular device.
